

# Worksheet: UX of AI challenges

1. Explainability - How will we help our user understand certain outcomes?	2. Managing expectations - How will we establish realistic expectations?	3. Graceful failure & accountability - How will we design for trust in case of failure?
4. User feedback - How will your user provide feedback to the system?	5. User autonomy - How will the user be able to customize their experience?	6. Data privacy & security - How will you collect, store, and handle data?
7. Computational translation - How will you turn needs into parameters?	8. Bias & inclusivity - How will you prevent bias and guard inclusivity?	9. Ethics & (un)intended consequences - How will you look out for negative and positive impact?
10. Which other (design) challenges do you foresee?		

**User Trust  
& Transparency**

**User Autonomy  
& Control**

**Value  
Alignment**
